- Catalan – C1
- English – B2
- French – Basic

PROFILE

I've been a software developer since 2022. I've done full-stack work with C# and .NET, built data solutions with Python and Snowflake for the banking sector, and I now develop applications with Java and Spring. I care about functional interface design, code quality and continuous improvement, and I enjoy working in a team to build software that is genuinely useful to people.

Open to new opportunities in Barcelona (hybrid) or remote.

WORK EXPERIENCE

JAVA DEVELOPER

Vargroup Andorra | Jan 2026 – Present

- Building new features with Java and Spring in large applications.
- Functional analysis, feature reviews and incident resolution together with the team.

SOFTWARE DEVELOPER • BANKING SECTOR

Vargroup Andorra | Nov 2023 – Jan 2026

- Cloud data lake: processing large data volumes with Python and Snowflake, ETL pipelines with Airflow and automated daily and monthly loads.
- Automation and validation of data processes fed by daily files: detecting inconsistencies, duplicates and incomplete data.
- Web applications with .NET and SQL Server: stored procedures and optimised queries.
- AI-based email classification in Python (pandas) to reduce manual work.
- Internal tools in VBA (Excel and Access) and conversion of SWIFT financial messages in Java.

JUNIOR FULL-STACK DEVELOPER

BDR Informàtica | Jul 2022 – Nov 2023

- Full-stack development with C#, Blazor, .NET and SQL.
- Management and maintenance of WordPress sites (Divi, Elementor).

PROJECTS

DUARTEDOMINGOS.NET • 2026

My personal website, rebuilt from scratch with Astro. Static, fast, accessible and in three languages.

CAREFIT • 2023

My final degree project. A workout mobile app built with Flutter and Firebase to create routines and track each session.

SKILLS

Back-end: Java • Spring • C# • .NET • WPF

Data: Python • SQL Server • Snowflake • Airflow • AWS • SAS

Front-end and mobile: Flutter • Firebase • Blazor • TypeScript • Astro • Tailwind CSS

Tools: Git • AWS CodeCommit • SVN • VBA • Scrum
